# *Index to Volume 10*

## *Subjects*

*L*) denotes letter to the Editor,
*N*) short note,
*R*) conference or exhibition report.

Acoustics lectures *403(N)*
Air table for only £12 *99*
*All About Science* *126(N)*
Applied science for the over 16s *5*
Applied science in schools *4(N)*
Archimedes and burning mirrors *517*
Astronomy, O level *261(N)*
Astronomy resources *74(N)*
Astronomy, Resources for teaching *259(R)*
Atom, Size of *508*
Atomic physics charts *126(L)*
Audio–visual *37(N)*, *508(N)*
Audio–visual, Opening out *257(N)*

Bacon–Descartes–Mpemba phenomenon *124(L)*
Binders *18(N)*
Book, A lookback at an early text- *322*
Book review article *118*, *329*, *396*
Book reviews *61*, *104*, *331*, *397*, *460*, *526*
Books for Nuffield A level physics *74*
Books for schools *68*, *394(L)*
Books, Journals and reference- *83*
Books on A level subjects related to physics *79*
Books on conventional A level physics *72*
Books on experiments and projects at A level *76*
Books on the history, sociology and philosophy of physics *85*
Books on topical themes and introductory reading *82(N)*
Books, Role of - in physics teaching *69*
Brain teaser *18*, *367*, *411*, *503*, *525(L)*

Capillary viscometer, A simple *102*
Centrifugal force *124(L)*, *328(L)*
Colour, The science of *316*
Communication and leadership course *8(N)*
Comparability of O levels *67(N)*
Computer based learning *76(N)*
Computer graphics, Interactive *401(R)*
Computer, Modular analogue *424*
Computer programs, Physical science *456(N)*
Computer, Simple homogeneous analogue *374*, *430*
Conferences and courses *64*, *128*, *336*, *400*, *464*, *528*
Conservation laws *92(N)*
Correspondent, Request for *261(N)*
Counting time of a radionuclide, Estimating the optimum *371*, *525(L)*
Course for lecturers *447(N)*
Courses, Modular degree - at Surrey *1(N)*
Crowds, An analysis of the flow of *418*
Crystal model which crystallizes without bonds *101*
Curricula, New *258(N)*
Curve follower and an optical density display *314*

Dia- and paramagnetism, Demonstration of *99*
Diffraction experiments *2(N)*
Distillation *43(N)*
Doppler effect *395(L)*
Doppler radars *510*

Earthly mechanics *28*, *326(L)*, *393(L)*, *463(L)*
Edinburgh lectures *468(N)*, *469–86*
Education, Evaluating progress in physics *338*
Education, Future of *481*
Electromagnetic relationships, Displaying *59(L)*
Electron physics *126(N)*
Electronics teaching, Approaches to *65(R)*
Energy resources, Course on *480(N)*, *493*
Energy sources *55(N)*
Engineers and technologists *403(N)*
ESDU texts *14*
Ether, Detection of the *327(L)*
Experimental physics *416(R)*
Eyepiece, An instructive *499*

Film review supplement, Physics *289*

Film reviews *334, 403, 511*
Film series, 'Earth and sky' *49(N)*
Fluid flow projects *389(N)*
Fluorescence technique for monitoring oil pollution *42*
Forces acting on a hose *327(L)*

Galvanometer, Using a mirror - to illustrate 'pumped' oscillations *370*
General science, Teaching of *3(N)*
Grants, Scheme for small *261(N)*

Hann B F: Appreciation *66*

Inertia of potential energy *55*
Information bureau *402(N)*

Journals *325(N)*

Keller plan *284, 380, 461(L)*

Laboratory course *281*
Laboratory health and safety *384(N)*
Lecture presentation, A two channel slide method for *52*

Magnetic vector potential, Experiments with *266*
Manometer, Simple capacitance *390*
Mathematics – physics interface *90(R), 121(L), 340(N), 341–56*
Maxwell and the displacement current *45*
Mechanics of flight *385*
Microphones and sound waves *395(L)*
Microwaves in measuring low velocities *312*
Model of car suspension system, Analogue *370, 525(L)*

Newton's first and third laws *462(L)*
Notes on experiments *98, 312, 370, 437, 496*

O and A level syllabuses *57(L)*
One dimensional collisions, 17th century treatments of *457*
Open day with a difference *338(R)*
Open university 1975 *65(N)*
Optics, Experiments in *496*
Oscar satellites as physics aids *260(N)*

Permittivity of air or space, Determination of absolute *98*
Photoelectric effect *123(L)*
Physical science computer programs *456(N)*
Physics A level *280(N)*
Physics and education *400(N)*
Physics apparatus *43, 127, 335, 340, 403, 468*
Physics at work *466(N)*
Physics, education and society *469*
Physics education for today *1, 327(L)*
Physics, The future of *337, 475, 522(L)*
Piezoelectric ceramics *274*
Plastic plastics *125(L)*
Polarization of rainbows *50*
Polymer physics *27(N)*
Polymer science and technology *395(N)*
Polytechnics, Crossdisciplinary courses for *272*
Power station game *445*
Power stations, The physics of *448, 504*
Project work in school and higher education *18(R), 58(L)*
Project work in universities *20*
Projects in schools *58(L)*
Properties of matter *468(N), 487–92*
Pulsating stars *271(N)*
*pVT* surface, Determination of *498*

Queries in physics *24, 90, 321, 369, 463, 467(N), 521*

Radiation risks *412*
Radioactive decay chains, Simulating *437*
Radiological protection *258(N)*
Relativity and an experiment on high velocity particles *364*
Research in schools *66(N)*

SATIS *339(N)*
Schrödinger equation for the hydrogen atom using a modular analogue computing system, Solution of the *424*
Schrödinger, Erwin *357*
SHAC—A simple homogeneous analogue computer *374, 430*
Simple harmonic motion *523(L)*
Soap film lecture *456(N)*
Soap films, Problem solving with *452, 500*
Social context, Science in a *404*
Society, Physics and - , a view from the Open University *407*
Society, Physics in *401(N)*
Sound operated switch in free fall experiments *313*
Sound, Teaching of *395(L), 401(N)*
South West physics centre *465(R)*
Special relativity, Teaching *361*
Spectrometry, an alternative experiment for *438*
Stamps, Physics on -: Appendix V *44*
Stefan's law, A simple test of *25, 392(L), 525(L)*
Straight lines, The fitting of *59(L)*
Swing, How to make a - go *367, 524(L)*
Syllabuses, O and A level *57(L)*
Syllabuses, Reducing the size of *465*

Teachers, Course for new *436(N)*
Teachers, Training of physics *257, 513*
Technology, OND *9*

Technology for teachers *389(N)*
Telescopes, Teaching *393(L)*
Temperature, Teaching *67(R), 525(L)*
Tides of the British seas *262*
Traffic accidents, The physics of *30*
Transients on a storage oscilloscope, Demonstration of *372*
TTL, An elementary introduction to *440*
Turbulence and drag reduction: a macroscopic view *305*

Velocities, Measurement of low *312*
Velocity of sound, Measurement of - in terms of elastic modulus *420*
Verbal style, The effect of - in physics teaching *38*
Volcanoes *93*

Waves, Longitudinal *328(L)*
Waves, Teaching *41(N)*
Weight and centrifugal force *57(L)*
Weight and mass *58(L)*
Why is this a bad question? *266, 360, 403, 480, 525(L)*
Wind tunnel, A versatile laboratory - *35*

Young peoples lectures *467(N)*

# *Authors with titles*

(*L*) denotes Letter to the Editor,
(*N*) short note,
(*R*) conference or exhibition report.

Aigrain P: Where is physics going? *475*
Akrill T B and Allchin D F: Open day with a difference *338(R)*
Allchin D F and Akrill T B: Open day with a difference *338(R)*
Allen P S: A two channel slide method for lecture presentation *52*
Allerton D and Daycock J T: The use of a sound operated switch in free fall experiments *313*
Archenhold W F: Books for schools *68*
Archenhold W F: The future of physics *337*
Aspden H: The elusive ether *327(L)*
Aspden H: Weight and centrifugal force *57(L)*

Baggott J B, Hanlon J, Harward L W A, McKee J S C and Stait H E: A versatile laboratory wind tunnel *35*
Baldock R N: Displaying electromagnetic relationships *59(L)*
Ball J E: A fluorescence technique for monitoring oil pollution *42*
Berridge H J J: Radioactive decay chains—a digital method *437*
Bignell B and Deeson E: Books on conventional A level physics *73*
Bligh P H and Hards P: A large air table for only £12 *99*
Bondi H: Physics, education and society *469*
Boud D J, Bridge W A, Maas P and Stace B C: A potentiality of the Keller plan in the transfer of courses *380*
Bowlt C: A simple capillary viscometer *102*
Bridge W A, Maas P, Stace B C and Boud D J: A potentiality of the Keller plan in the transfer of courses *380*
Browning D R: Applied science for the over 16s *5*
Browning D R: SATISfying a need *339(N)*
Bruin F: A curve follower and an optical density display *314*
Burge E J: Approaches to electronics teaching *65(R)*
Burge E J: Physics on stamps: Appendix V *44*

Chalmers A F: Maxwell and the displacement current *45*
Chapman B R: Nostalgia—or nous? A lookback at an early textbook *322*
Chapman B R: The future of physics *522(L)*
Chapman R: Multiple slit electron diffraction experiments *2(N)*
Chester W N: Simple harmonic motion *523(L)*
Clarke D: An alternative experiment for spectrometry *438*
Cobb L L and Dyson J E: An electronic switch for the determination of the absolute permittivity of air or space *98*
Collyer A A: Turbulence and drag reduction: a macroscopic view *305*
Culpin M F: Centrifugal force *328(L)*

Davies R O: Earthly mechanics *326(L)*, *463(L)*
Daycock J T and Allerton D: The use of a sound operated switch in free fall experiments *313*
Deeson E: Bacon–Descartes–Mpemba *124(L)*
Deeson E: Open university 1975 *65(N)*
Deeson E: Opening out audio–visual *257(N)*
Deeson E: Plastic plastics *125(L)*
Deeson E and Bignell B: Books on conventional A level physics *73*
Durrant J K B: The South West physics centre *465*
Dutton P E: Physics education for today *1*
Dutton P E: Teacher's PETT *403(N)*
Dynan M B: Physics education for today *327(L)*
Dyson J E: Demonstration of transients on a storage oscilloscope *372*
Dyson J E: Measurement of low velocities by the Doppler effect, using microwaves *312*
Dyson J E and Cobb L L: An electronic switch for the determination of the absolute permittivity of air or space *98*

Ebison M G: O level astronomy *261(N)*
Ebison M G and Gee B: Books on the history, sociology and philosophy of physics *85*
Edwards S J: The science of colour *316*
Ellington H I and Langton N H: The physics of power stations: Part 1: Fossil fuelled power stations *448*
Ellington H I and Langton N H: The physics of power stations: Part 2: Nuclear power stations *504*
Ellington H I and Langton N H: The power station game *445*

Fletcher N H: Mechanics of flight *385*
Flinn I: Piezoelectric ceramics and their applications *274*
Frutos F, Lozano M, Rey A, Hernandez V and Leal J: Curved light rays and pseudo lenses: Some old experiments revisited *496*

Gardiner D: O and A level syllabuses *57(L)*
Gee B: Resources for astronomy teaching *259(R)*
Gee B and Ebison M G: Books on the history, sociology and philosophy of physics *85*
Goehring G Daniel: 17th century treatments of one dimensional collisions *457*

Graham G R: Polarization of rainbows *50*
Gray B F: OND Technology *9*

Haber-Schaim U: Mathematics in the pre-service education of science teachers *354*
Hackett R Q and Wilson A W: Books for schools *394(L)*
Hanlon J, Harward L W A, McKee J S C, Stait H E and Baggott J B: A versatile laboratory wind tunnel *35*
Hards P and Bligh P H: A large air table for only £12 *99*
Harland D B: A simple analogue model of a car suspension system *370*
Harward L W A, McKee J S C, Stait H E, Baggott J B and Hanlon J: A versatile laboratory wind tunnel *35*
Hawkesworth M R and Weaver D R: Teaching temperature *67(R)*
Heddle D W O: A simple test of Stefan's law *392(L)*
Helm H: Newton's first and third laws *462(L)*
Helsdon R M: Longitudinal waves *328(L)*
Hernandez V, Leal J, Frutos F, Lozano M and Rey A: Curved light rays and pseudo lenses: Some old experiments revisited *496*
Hesketh R V: How to make a swing go *367*
Hewton E: Project work in universities *20*
Higbie J: Inertia of potential energy *55*
Higginbotham I G: A Keller plan course in first year university physics *284*
Hinson D J: July issue *525(L)*
Hodgson E R and Lambert R K: Photoelectric effect *123(L)*
Hooper D: Who is to teach general science? *3(N)*
Houston J: The effects of verbal style in physics teaching *38*
Howes Robin W: Radiation risks—a possible teaching topic? *412*
Hughes J A R: Less and more slowly *465*

Isenberg C: Problem solving with soap films: Part 1 *452*
Isenberg C: Problem solving with soap films: Part 2 *500*

Jackson G: A clashing discord *401*
Jackson G: How to make a swing go *524(L)*
Jalaluddin A F and Parmar D S: A simple capacitance manometer *390*
James A N: A crystal model which crystallizes without bonds *101*
James C: The fitting of straight lines *59(L)*
Jardine J: Theoretical problem—practical solution *416(R)*
Jarvis B: Why do projects in schools? *58(L)*
Jarvis W H: The Oscar satellites as physics teaching aids *260(N)*
Jarvis W H: Using a mirror galvanometer to illustrate 'pumped' oscillations *370*
Jones Barrie W: Determination of the *pVT* surface of a freon *498*
Jones Barrie W: Physics and society—a view from the Open University *407*
Jowitt R and Seville A H: A laboratory course for the 'Systems and management' degree *281*

Kaddoura A: Where is education going? *481*
Kay S M: Project work in school and higher education *18(R)*
Kelly D T: ESDU texts *14*
King I J and Stephens R W B: Experimental acoustics: Part 1: Measurement of velocity of sound in terms of elastic modulus *420*
Knight P: The physics of traffic accidents *30*
Kunar L N S: Volcanoes *93*

Ladd M F C: Modular degree courses at Surrey *1(N)*
Lambert K M: The training of physics teachers *513*
Lambert R K and Hodgson E R: Photoelectric effect *123(L)*
Langton N H and Ellington H I: The physics of power stations: Part 1: Fossil fuelled power stations *448*
Langton N H and Ellington H I: The physics of power stations: Part 2: Nuclear power stations *504*
Langton N H and Ellington H I: The power station game *445*
Leadstone G S: Bacon–Descartes–Mpemba *124(L)*
Leal J, Frutos F, Lozano M, Rey A and Hernandez V: Curved light rays and pseudo lenses: Some old experiments revisited *496*
Lewis J L: Books for Nuffield A level physics *74*
Lowe I: Using case studies in the teaching of physical principles *491*
Lozano M, Rey A, Hernandez V, Leal J and Frutos F: Curved light rays and pseudo lenses: Some old experiments revisited *496*

Maas P, Stace B C, Boud D J and Bridge W A: A potentiality of the Keller plan in the transfer of courses *380*
McClelland G: Earthly mechanics *393(L)*
McClelland G: Earthly mechanics: two misapprehensions and a heresy *28*
McKee J S C, O'Connor G and Murray M J: An analysis of the flow of crowds *418*
McKee J S C, Stait H E, Baggott J B, Hanlon J and Harward L W A: A versatile laboratory wind tunnel *35*

McKim F R: Books on A level subjects related to physics *79*
MacLeod A M: An elementary introduction to TTL *440*
McMullan J T, Morgan R and Murray R B: A course on energy resources and supply *493*
Malvern D: Synchronizing mathematics and physics in the sixth form *344*
Matthew J A D: Erwin Schrödinger 1887–1961 *357*
Matthews G G: The Keller plan *461(L)*
Morgan R, Murray R B and McMullan J T: A course on energy resources and supply *493*
Murray M J, McKee J S C and O'Connor G: An analysis of the flow of crowds *418*
Murray R B, McMullan J T and Morgan R: A course on energy resources and supply *493*

O'Connor G, McKee J S C and Murray M J: An analysis of the flow of crowds *418*
Ormell C: Towards a naturalistic mathematics in the sixth form *349*

Parmar D S and Jalaluddin A K: A simple capacitance manometer *390*
Parton C G: Weight and mass *58(L)*
Petersen T M H: Centrifugal force *125(L)*
Phillips M: Microphones and sound waves *395(L)*
Podmore F: Atomic physics charts *126(L)*

Ratcliffe G: Crossdisciplinary courses for polytechnics *272*
Rey A, Hernandez V, Leal J, Frutos F and Lozano M: Curved light rays and pseudo lenses: Some old experiments revisited *496*
Rogers E: Earthly mechanics *326(L)*

Salandin G and Thomsen P: Relativity and an experiment on high velocity particles *364*
Sandon F: Tides of the British seas *262*
Schofield R: Journals and reference books *83*
Schofield R and Winter C F: Physics and mathematics in the sixth form *341*
Sedgwick D: Estimating the optimum counting time of a radionuclide *371*
Seville A H and Jowitt R: A laboratory course for the 'Systems and management' degree *281*
Simms D L: Archimedes and burning mirrors *517*
Skinner J W: Experiments with magnetic vector potential *266*
Smith A L: Mathematics–physics interface *121(L)*
Spurgin C B: An even worse question! *525(L)*
Spurgin C B: Demonstration of dia- and paramagnetism *99*
Stace B C, Boud D J, Bridge W A and Maas P: A potentiality of the Keller plan in the transfer of courses *380*
Stait H E, Baggott J B, Hanlon J, Harward L W A and McKee J S C: A versatile laboratory wind tunnel *35*
Steffens F G: Teaching telescopes *393(L)*
Stephens R W B and King I J: Experimental acoustics: Part 1: Measurement of velocity of sound in terms of elastic modulus *420*
Stewart A: SHAC—A simple homogeneous analogue computer: Part 1 *374*
Stewart A: SHAC—A simple homogeneous analogue computer: Part 2 *430*
Summers M K: Solution of the Schrödinger equation for the hydrogen atom using a modular analogue computing system *424*
Sutton A L: An instructive ×1 eyepiece for microscopes and telescopes *499*

Tabor D: Macroscopic properties and interatomic forces *487*
Tawney D A: Books on experiments and projects at A level *76*
Tawney D A: Interactive computer graphics *401(R)*
Tawney D A: Masters of school physics *257*
Thomsen P: Evaluating progress in physics education *338*
Thomsen P: The role of books in physics teaching *69*
Thomsen P and Salandin G: Relativity and an experiment on high velocity particles *364*

Warren J W: Forces acting on a hose *327(L)*
Weaver D R and Hawkesworth M R: Teaching temperature *67(R)*
Williams W F: Science in a social context *404*
Wilson A W and Hackett R Q: Books for schools *394(L)*
Winter C F and Schofield R: Physics and mathematics in the sixth form *341*
Woolnough B: Appreciation: B F Hann *66*
Woolnough B: The mathematics–physics interface in schools *90(R)*
Wray E M: A simple test of Stefan's law *25*

Ziggelaar A: Teaching special relativity *361*
